www.gd0tep.com QSO confirmed. Thanks QSO - 73 de Andy		2x SSB~2x CW

Mode: Es TEP Tropo Au F2 M.S. or Via the " " Satellite

Equipment: For HF i use the Icom 735 and wire dipoles for antennas. For 50 mhz i use the FT650 driving an amplifier built around the 3cx800a7 valve. Normally i use one 6 element cushcraft yagi, but i also have four 7 element create antennas that can be used for contesting, or for 6m EME. The QSL shows two 6m antenna systems, each is 7 over 7 elements. For 2m and 70cm i use the Icom 821h with two small amplifiers giving me 150w on 2m and 130w on 70cm. The antennas are x5 for 2 and x11 for 70cm. 73 de Andy

My Email address is: Andy_kissack@compuserve.com

Thanks for the QSO. 73 for now de Andy.....

Please QSL for a new country
Please QSL for a new Grid Sq.
Thanks for your QSL
